

STONY PLAIN SUN.

VOLUME ELEVEN

STONY PLAIN, ALBERTA, THURSDAY, MAY 14, 1931

Whole Number 568

Here and There

Total number of poultry on farms at end of 1930 in the Dominion was estimated at 69,735,000, of which 55,247,500 were hens and chickens. Value of this poultry was placed at \$54,552,000.

Radio is to be used to aid in forest fire protection in Northern Saskatchewan. The provincial forestry department has decided to establish a system of look-out towers equipped with short wave radio sending and receiving sets.

A catch of 244 salmon by three anglers in nine days has been reported recently from the Cain's River, New Brunswick, by G. W. Scott, of Keene, New Hampshire, who was one of the party, and himself netted 111 of the fish.

More United States branch factories are established in Canada than in any other country outside of the United States itself. At the beginning of last year over 500 such factories were in the Dominion, representing investments of \$540,590,000.

Shipping of all kinds entering and leaving Canadian ports has increased 60 per cent. in the last ten years. Total net tonnage exclusive of coaling, for year to March 31, 1930, was 89,432,789 tons. To this must be added net tonnage of 87,734,773 tons for vessels entered and cleared coastwise.

A gold-headed cane was presented by the Montreal Harbor Commission to Captain A. Fraser, master of Canadian Pacific Steamship Duchess of Richmond, on the occasion of the first arrival of the season at Montreal of a trans-Atlantic liner. The Duchess of Richmond reached port April 19.

Increased tourist traffic to Canada from the United States is fore-shadowed by reports from Canadian Pacific passenger agents in the U. S., which show a much larger number of enquiries from would-be travellers than in former years. J. B. Foster, passenger traffic manager of the railway, stated recently in an interview at Saint John.

Canada said an revoir but not good-bye to Their Majesties the King and Queen of Siam at the border station of Fort, Saskatchewan, whither they had travelled by Canadian Pacific on their journey to New York. They were passengers by the Empress of Japan on that ship's record-breaking passage from Yokohama to Vancouver.

"It's not so much the captain as the chief engineer who makes speed records possible at sea," Captain Samuel Robinson, of the Canadian Pacific liner Empress of Japan, told the Vancouver Board of Trade recently, at a luncheon in his honor, after his ship had clipped another seven hours from her previous speed record across the Pacific. She had averaged 22.27 knots over the 4800-mile course from Yokohama to Victoria, a speed hitherto unheard of.

Largest and most powerful locomotive of its kind in the world and unique on this continent, Canadian Pacific Railway "8000" type engine, product of Canadian brains and skill and composed largely of Canadian materials, has just been turned out by the Angus Shops of the company at Montreal, for use in the railway's Rocky Mountain territory. Engine and tender weigh together 322½ tons and it has a tractive effort of 90,000 lbs., sufficient to pull a mile-long freight train of 150 four-ton trucks, weighing 8,000 tons, on a level track. Monday's Fire.

On Monday afternoon about 3 o'clock the 7-roomed house of Mr Jac Mayer Jr., on the Baseline, three miles from Stony Plain, caught fire from a defective chimney. There being no means at hand to quench the blaze, an alarm was sent up to Mr Wes Hubbel's and in to Stony Plain.

A truckload and half-a dozen carloads of volunteers responded from Stony; as also did a crew from Mr Hubbel's. All efforts to save the burning building were fruitless; but fortunately the wind was in the right direction, to eliminate the danger to adjoining buildings.

Mr Meyer is unfortunate this year, having suffered a loss by fire last February, when a large-sized hen house was destroyed, with the contents.

Accident on the Baseline.

While Mr Jac McGillis was motoring home to Stony early Sunday morning in his Chrysler coupe, and had reached the Joe Guenette corner, on the Baseline, his car skidded on a soft spot on the gravelled road.

The driver made an effort to right the vehicle, but without success; and the car took to the diten on the south side and bounded along for some 100 feet and came to rest after turning a few somersaults and striking a phone pole.

The machine caught fire and burned everything inflammable. A wrecking outfit from the City came out on Sunday morning with a derrick, and towed the remains to Edmonton.

None of the occupants of the car were seriously injured. Mr McGillis escaping with a bruise on his left shoulder.

Senior Baseball.

At the exhibition ball game Stony Seniors played in Edmonton last week, Herman Loeblich got a great reception from the City ball fans, who remembered his phenomenal pitching there several years ago in the amateur league series. The exhibition game was with the South Siders, the latter winning by 5 runs to 2. The Journal sports writer says: "Some masterful twirling by Herman Loeblich, who whiffed 12 South Side batsmen was one of the features of the game. The fair sized crowd in the bleachers got a real kick out of the proceedings."

Sunday was an off day for the Seniors, as the promised game, at Stony, with the South Siders did not materialize.

This Week's Fome.

You need your money
And I need mine.
If we both get ours
'Twill sure be fine.
But if you get yours
And hold mine too.
What in the world
Am I going to do?"

Taking Canada's Census

The decennial task of "counting noses" in Canada, or, in other words, the enumeration of the census of the Canadian people, takes place in the month of June. It is a big and fairly expensive job requiring the services of a small army of men, and, after their initial work is completed, hundreds of clerks and expert statisticians will be engaged for months compiling, tabulating and analyzing the returns sent in to Ottawa by these thousands of enumerators.

The question may naturally arise in the minds of some people: Is it all worth while? Is such a large expense justified, especially in these times of declining revenues and enforced economies, merely to ascertain how many people there are in Canada, and an array of facts relative to each individual?

There can be only one answer to such questions. It is very much worth while; in fact, it is vitally important. Just as it is of importance and value to a farmer to know how many bushels of grain he may have produced from a given number of acres; how many chickens he possesses; how many pounds of milk and cream his cows have produced; or to a business man how great his annual turnover has been, so is the collection of the census information of importance and value to the nation as a whole. It is a form of national stocktaking.

But that is not all. Under our Canadian system of government, and the relationships, financial and otherwise, which exist between the Federal and Provincial governments, population is an important factor. In many respects it is the all-important, the deciding factor.

First and foremost, the representation of the people in Parliament is based on population. Let us illustrate: Suppose, for example, the census shows a population of 3,000,000 people in the Province of Quebec. Under the constitution those 3,000,000 people are entitled to 85 members in the House of Commons, that is, one member for each 46,154 people. Therefore, each group of 46,154 people in every other Province is entitled to a member. After each decennial census there is a redistribution of representation in the House of Commons based on the facts disclosed by the census. In this way the representation of all parts of the Dominion is made and kept uniform and equitable.

Furthermore, the financial relations between the Dominion and the Provinces is based on population. The Dominion pays cash grants to the Provinces of so much per head of population, and in the case of the three prairie provinces it pays increasing amounts annually as population increases until a certain maximum amount is reached. Thus there is a census-taking these amounts could not be accurately ascertained.

Again, only by knowing the population it is possible to arrive at such facts as the amount of the per capita debt, per capita taxation, volume of trade and commerce per capita, and a volume of other statistical matter upon which both national and Provincial policies of finance and taxation are founded.

While the enumerators are thus "counting noses" they are also gathering other important information. The wealth of the Dominion, its productive capacity, the social condition of its people, their racial antecedents, the extent of their illiteracy, how many males and how many females, how many children, middle-aged, and aged people—information all having a bearing on future policies for the development and well-being of the Canadian nation.

This year, for the first time, complete information is to be obtained on the subject of unemployment—how many are out of work, the nature of their usual employment, what caused their state of unemployment, etc., etc.—all with a view to finding out the actual extent and causes of unemployment as a guide to finding out and applying the necessary remedies, and developing policies to prevent a recurrence of such an unsatisfactory and deplorable condition.

It will be seen, therefore, that the census-taking is a vitally important national undertaking. It is clearly the duty of every citizen to co-operate with and assist the census enumerator in his work. His questions should not be resented, but, on the contrary, should be welcomed and full information freely and gladly given to him. He will be discharging his duty, a national duty at that. In this manner the citizen will be discharging a national duty by extending every assistance in his power.

Largest Fox Shipment

The largest single shipment of white fox pelts ever received in Winnipeg reached the city recently by Canadian National express. This shipment was transported from the shores of Hudson Bay over the Hudson Bay Railway. The shipment, which was billed independently of the large fox companies included 431 white fox pelts and a dozen red fox pelts, all of which were trapped in the high north during the past winter.

Has Many Friends

One of New York's wealthiest bachelors is Sumner, Ballard, once known as "a millionaire reporter." Each year in his town house he gives a dinner party for 200 of his friends. It is said to comprise the largest list ever collected under a single roof, representing almost every strata of society from newsworthy to millionaire.

Denmark has only 178 miles of air service routes.

Heart and Nerves So Bad Was Unable To Sleep For Hours

Mrs. Theresa M. Ravary, Gallington, Ont., writes: "I was troubled, for almost a year, with my heart and nerves, especially on retiring at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The J. Milburn Co. Ltd., Toronto, Ont.

Soviets Could Mobilize Large Army Quickly

National Leaders Have Made Provision For Any Emergency

Despite protests from the Soviet that the Russians are working for peace it is estimated that the nation could mobilize an army of 17,000,000 men within three months of the outbreak of war. Of these, some 10,000,000 would be members of line regiments and provide a rifle strength of that number.

Within three weeks of the start, the Soviet is believed capable of throwing 2,000,000 fighting men into action. In addition, the national leaders have been concentrating on supplies, and they keep permanently in reserve enough food to last three months. They are also building up the air wing of the fighting corps.

Besides tossing bushels of wheat on the world markets, the Soviet is evidently ready to throw in quite a supply of cannon fodder when the time comes.

MOURING WARDROBE

"A death occurred in our family and I had to go to mourning. I could hardly afford to buy all black clothes, so decided to dye what I had. I consulted our druggist and he advised using Diamond Dyes. Everything came out beautifully: coats, wool, stockings, and all. I have since learned to appreciate the excellence of the black Diamond Dyes. I tried other black dyes and the results were impossible. I had to get Diamond Dyes and do the work over. Recently I have tinted my curtains a beautiful raspberry shade and dyed a rug a lovely garnet with Diamond Dyes. They are real money savers—the finest dyes money can buy—I truly believe."

Mrs. G. K. L., Montreal.

Vimy Memorial

Major Newburn Will Endeavour To Hasten Completion Of Work

Maj.-General (S. C. Newburn, of Hamilton) who is called for Europe on the "Empress of France" will endeavour to hasten completion of the Vimy memorial while overseas, he said. Before the boat left, the officer, in referring to the memorial said:

"As chairman of the national battlefields commission, I am going to meet General Hughes, who is now in Europe, and one of the things I will do is try and expedite the completion of the Vimy memorial. This memorial was supposed to be finished next year, but I understand there has been some delay in receiving the stone and while I can say nothing officially, it is possible that the completion of the memorial will be somewhat later than expected."

Worms are encouraged by morbid conditions of the stomach and bowels, and so subtle is Miller's Worm Powder will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Record For Apple

Apples of any variety that cannot stay a week off the branch without rotting ought to blush in shame before the record of a clove apple in the possession of Mrs. Charles Hollins, Worcester, Mass. Plucked at Bridgewater 62 years ago and preserved, it is in as good a condition as it just taken from a tree.

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Market Low Grade Wheat

The Edmonton Chamber of Commerce has appointed a committee to prepare a report in connection with the development of an Eastern market for low grade Alberta wheat and coarse grain. The object will be to sell to Ontario and Quebec supplies of low grade grains for feeding purposes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Use Machine Guns

Toronto Police Force Being Trained To Handle Deadly Weapons

Detectives of the Toronto police department are being trained to handle machine guns if the occasion ever arises to use these deadly weapons, the Toronto Star says. Three guns that fire 1,000 rounds in a minute and bullets that travel 930 feet a second, are being experimented with by Inspector Robert Alexander, aide to Sir Charles Draper, and officer in charge of training.

Officers of the motorcycle squad, the Star further says, are also taking part in the training which will be extended to other ranks after all detectives are thoroughly schooled.

The Bible contains two chapters, which are nearly alike, word for word. They are the nineteenth chapter of II Kings, and the thirty-seventh chapter of Isaiah.

Government Advertising Campaign

Large Sum Spent In Urging People To Buy Canadian-Made Goods

Total of \$92,020.77 was spent by the Dominion Government in the advertisement of the Department of Trade and Commerce which urged the people of Canada to buy Canadian-made goods. This sum had been spent since the present administration assumed office, according to a return tabled in the House of Commons.

"The money was distributed among the newspapers of the country as follows: Daily News, \$38,023.48; health papers, \$36,417.48; miscellaneous, \$13,976.98, and weeklies \$3,602.84.

A new automobile has been constructed in London, England, for the Maharajah of Patiala, the glass enclosure of which enables the occupants to see out, but prevents outsiders seeing in.

AN OPPORTUNITY TO HOLDERS OF EARLY MATURING
CANADIAN GOVERNMENT BONDS
TO EXTEND THE TERM OF THEIR INVESTMENT IN
THE PREMIER SECURITY IN CANADA

GOVERNMENT OF THE
DOMINION OF CANADA
1931 CONVERSION LOAN

The Minister of Finance of the Dominion of Canada offers to holders of the undernoted Dominion issues the privilege of exchanging their bonds into longer dated issues, in the following terms and under the following conditions:

[This offer affords to holders of bonds eligible for conversion, the same interest payment and tax-free privileges, for the life of and as contained in the present bonds, and the opportunity of extending the term of the investment at 4½% per annum.]

WAR LOAN 5% BONDS MATURING 1st OCTOBER, 1931—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1936, bearing interest from 1st April, 1931. The first coupon will be for six months' *tax-free* interest at the rate of 5% per annum payable 1st October, 1931; the second coupon will be for seven months' interest at the rate of 4½% per annum payable 1st May, 1932; thereafter to maturity interest will be payable half-yearly at 4½% per annum.

RENEWAL LOAN 5½% BONDS MATURING 1st NOVEMBER, 1932—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1937, bearing 4½% interest payable half-yearly from 1st May, 1931. There will also be attached to these bonds three adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932, for additional interest at the rate of 1% per annum.

VICTORY LOAN 5¼% BONDS MATURING 1st NOVEMBER, 1933—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1938, bearing 4½% interest payable half-yearly from 1st May, 1931. The first five interest coupons, being those to and including 1st November, 1933, will be *tax-free*. There will also be attached to these bonds five *tax-free* adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932 and 1933, for additional interest at the rate of 1% per annum.

VICTORY LOAN 5¼% BONDS MATURING 1st NOVEMBER, 1934—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1939, bearing 4½% interest payable half-yearly from 1st May, 1931. There will also be attached to these bonds seven adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932, 1933 and 1934, for additional interest at the rate of 1% per annum.

Conversion applications in the terms of the foregoing are invited to a total of \$250,000,000. The Minister of Finance reserves, however, the right to increase or decrease this amount at his discretion.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by recognized Canadian Bond Dealers and Stock Brokers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists to the foregoing will open on 11th May, 1931, and will close on or before 23rd May, 1931, at the discretion of the Minister of Finance.

Renew the Mustard in the Pot—Daily

The use of KEEN'S D. S. F. MUSTARD makes your dinner tasty and digestible.

Its delicious tingle enhances the flavor of your food, and its essential oils and its warmth, are incomparable aids to health and vigor.

For the enjoyment of your meals, and for better digestion,—replenish the mustard pot with Keen's D.S.F. mustard every day.

Women's Corner

A FEW RAMBLING REMARKS
BY A PRAIRIE WOMAN

Christmas time! What a busy time it is for the hundreds of mothers up and down the land who work so hard and so lovingly that Christmas shall be a happy and joyous occasion for their families. As we busy to and fro at this season of the year engaged in its many material duties, let us not lose sight of the real spirit of Christmas which should be at the back of all our festivity. The Christmas spirit methinks is giving, not that we may be given again, but giving to the needy, the poor, to those less favored than ourselves, not necessarily giving of worldly goods, some of us are hardly well endowed enough for that, but giving of our love, our companionship, our friendship to those who are lonely and starved and sad, and oh, that we could but remember that the greatest starvation in the world is not starvation of the body, but of the heart. I have known lonely old ladies who lived by themselves just starving for a friendly word, or for a pleasant chat with some one who felt a real interest in them. I have known young girls in large, gay cities who were lonely and heart sick of their cramped bedrooms and who ached for the companionship of a real home on Christmas Day. Perhaps you know someone far from home whom you could include in your family fold as a friend and could make their Christmas with you a happy event in their lives. Perhaps you think, "Oh we live so simply, we have no room for outsiders." Let them share your simplicity and for one day, just Christmas Day, let them feel they are not out siders.

Christmas Day is essentially the children's day. Does it not remind us that the Prince of Peace was once a little child, and that when He grew to manhood He did not forget the little ones but said, "Suffer them to come unto Me for of such is the Kingdom of Heaven." It would be nice to think, would it not, that on Christmas Day all the mothers in all the land were telling their children surrounded by the efforts which had been made for their enjoyment, of the Christ who had made Christmas possible and of his unselfish example to the world. It seems to me that the children are the sin of the twentieth century. What makes men mean, unkind,

SPEND YOUR WINTER IN COMFORT AT VANCOUVER

Where the climate is mild—no extreme cold, just healthful and invigorating—outdoor life possible with comfort practically all Winter.

You and your Family can take this trip at reasonable expense. Your Canadian dollar will buy 100 cents here. Living at Hotels, Boarding and Apartment Houses, Housekeeping Suites, etc., is reasonable. Ample accommodation.

WRITE FOR ILLUSTRATED FOLDER TELLING ALL ABOUT THE TRIP.

Free on request to Vancouver Publicity Bureau, 4 E. Davison, 228 Seymour St., Vancouver, B.C.

cruel, so that they will proffer even on the food supplies of the world, sometimes rather allowing them to rot than to sell them to his fellow men so much in need of them, in the endeavor to make money for himself, just selfishness, the desire, to have, have, for one's self, not carrying who else goes short. The mothers of the world can do so much with little children, they can observe the ugly head of self creeping up unduly in the young character and by loving care and patience may eradicate that which, if it is allowed to grow into hideous proportions, may develop a criminal. It is kinder for a child to have to sacrifice and to go without, than to have everything it wants, far kinder, if parents could only believe it.

I wish every mother of the prairie provinces into whose home this paper goes a VERY HAPPY CHRISTMAS, and I hope that to each one of us that day may come a sense of the strengthening and sweetening of character which does come from a realization of the spiritual presence of the Prince of Peace in our midst.

Prairie Woman is always desirous of having letters from our readers and is willing to help any who may need advice on problems of domestic or human interest. Two letters are often better than one, and if you have something which is puzzling you and upon which you would like help, just write to this corner and your inquiry will be carefully dealt with. All correspondence will be treated with the strictest confidence. Replies will be sent by mail if a stamped envelope is enclosed.

Send a Dominion Express Money Order. They are payable everywhere.

Questions and Answers

Question: Farmer's Wife. Who wrote Grany's Wonderful Chair? And what kind of a book was it?

Answer: The author of the book, "Grany's Wonderful Chair," was a blind Irishwoman named Frances Browne. The book is a book of fairy stories and is all the more wonderful considering the fact that she who wrote them had been blind from infancy and had never looked upon the beauties of nature.

Question: Will our world ever burn out like the Moon?

Answer: There can be no doubt of the answer to this question. Our earth may become like the moon. There will be certain differences because the earth is much larger than the moon. The moon has been too small to hold to itself the gases outside it. It has no air or atmosphere. The earth is liable to keep its atmosphere because it is bigger and so the power of its attraction is much greater. Such reasons as this will always make a difference between the earth and the moon.

Another difference is that in consequence of the rapid cooling of the moon the changes on its surface have been more violent than those on the earth. The biggest volcano of the earth is nothing compared with those of the moon. But all these points of difference do not affect the fact that our earth may possibly some day,

though after a far longer time than men lately thought, become cold and lifeless.

Question: What is thought?

Answer: We should always make a point of using the word thought in the strict way to mean the putting together of two ideas. "Tom is good" is a thought. It puts together the idea of Tom and the idea of goodness. We say that there is a relation between Tom and the state of goodness. "Tom is not good" is another thought, asserting another relation between Tom and goodness. So it has been said that thinking is relating. If the relating corresponds to the relation of the facts, then the thinking is true, if not it is false. Of course we must ask ourselves what it is that does this relating or thinking, whether rightly or wrongly—we all do it in our ways. Some people would say it is your brain that thinks, but I will say that it is your brain by which you think.

LAWS WHICH SHOULD INTEREST WOMEN

Within the meaning of the Children's Protection Act, under which child rescue work in the province of Saskatchewan is carried on, a child is regarded as neglected who is found begging, wandering about at a late hour, dwelling or associating with persons of bad repute or with one who is growing up without salutary parental control or in circumstances which expose the child to a disolute or idle life; found in any disorderly house or on the street; found in company with a criminal or a disorderly person; who is a destitute orphan or has been deserted by his or her lawful parents or guardians; found guilty of petty crimes and likely to develop criminal tendencies unless removed from surroundings; an habitual truant from school, whose only parent is undergoing punishment for crime; who is in peril of loss of life, health or morality by reason of ill treatment continued personal injury or grave misconduct or habitual intemperance of the parents of such child or either of them; who is the victim of neglect, cruelty or depravity; is an unfit place for such child. If in the opinion of the judge the child comes under any of these conditions he is committed to a Children's Aid Society or to the superintendent of neglected children, who finds a suitable foster home, in which the child may have a chance to grow into a good and useful citizen.

Every city with a population of 10,000 or over must maintain one or more places of refuge for neglected children, in which such children may be cared for, while a foster home is being selected where the child will have an opportunity to grow into a good and useful citizen.

The interposition of the superintendent as a third party standing between the blood parent and those who accept the care of the children protects the latter in two very important ways. First it entirely prevents those who are caring for the child from being interfered with by the blood parent who has been proved in open court to have failed in his duty, although in many cases the failure may be due to no fault of his own. The superintendent remains the real guardian of the child. Second, if the home where one of these children is placed is broken up, either by ill health, debt or financial ruin, the child need not be a burden on those no longer able to financially support it, for as the guardianship of the child is still with the superintendent, it is only necessary for the facts to be made known and the child again returned to his care. This is also better from the point of view of the child's interests, for it thus has a permanent protector whatever misfortune occurs in the foster home.

A high authority on Canadian potential development places the coal resources of this country at seventeen per cent. of the world's known coal deposits, although the output of the mines is now but three per cent. of the American production. The prairie strata of lignite of proved high-producing and retaining power at least rival the coal beds of the Dakotas.

Cuticura For All Skin Irritations

Bathe with Cuticura Soap and hot water to free the pores of impurities and follow with a gentle application of Cuticura Ointment to soothe and heal. They are ideal for the toilet, as is also Cuticura Talcum for perfuming.

See Size, (Bottle and Box), 25c. Sold throughout the Dominion. Canadian Depot: Messrs. Leslie, Ltd., 50 St. W., Montreal.

Cuticura Soap shaves without music.

Mothers, Be Fair!

How often we hear a mother remark: "I don't know what I would do without Sarah; I depend upon her for everything. She won't allow me to do anything around the house."

But that mother possibly never stops to think that Sarah's life has been sacrificed for the family's comfort. To begin with Sarah was capable and took such a firm hold of things that gradually everything was left for her to do.

Naturally she hated to see mother do certain tasks that seemed so heavy work, and so assumed them herself along with the multitude of other duties which had fallen to her lot. Possibly mother never thinks that in exchange for the harder tasks that Sarah has taken over there are some of the lighter ones that she might relieve her of. It isn't for one moment that mother wouldn't sacrifice anything in the world for Sarah, it's just that Sarah is so capable that mother quietly hands over the reins of the house to her. And so after a while Sarah has so much responsibility that she has no time for pleasure.

So the pleasure-loving years of her life pass, and finally she doesn't care very much about going out.

Just because your daughter is always ready and willing to work from morning until night, is no reason why she should be allowed to do so. See that she has the opportunity of associating with other young people. Work will be made cheerfully done when there is time for pleasure too.

The writer knew of one woman whose daughter had completely spoiled her. They were good workers and did everything they possibly could to save the mother work. The consequence was that the mother expected them to do everything and was never happier than when the two girls were busy at home working. Of course, she loved them, but she loved them so selfishly that she couldn't bear to have them away from her, and at the very mention of marriage for either of the girls she would always put forth the plea that she didn't see how she could ever "get along" without them.

Now that mother didn't know she was selfish and the blame possibly lay with the girls themselves for having spoiled her in their great love for her. Both girls are still at home, unwilling to hurt their mother in any way and yet chafing under the hand of duty.

Mothers, you had your youthful pleasures when you were young; see that your daughter doesn't have all work, and no play.

There is, of course, the other side, where mother is the drudge and daughter a bit of a butterfly. But it all rests with the mother. What her daughter becomes depends on her early home training. Make a companion of her and both pleasure and work will be evenly divided, and a happy home the result.

EARN MONEY AT HOME

We will pay \$15 to \$25 weekly for your spare time writing show cards; no experience necessary. Write for particulars to: THE CANADIAN LITHOGRAPH CO., 228 College St., Toronto.

"Martha"

THE HOME OF
HER ADOPTION
BY E. L.

(All Rights Reserved)

It is a dreadful feeling to wake up on board ship in the small hours of the morning, or in the dead of night to the realization that there is an unwanted bustle, people rushing here and there and talking in excited whispers, and as you become more widely awake you are aware of a sense of dread that you are on the ocean and that all is not well with your ship.

It was thus that Martha awoke the next morning after she and Glory had been discussing their forlorn condition. She thought that she had dreamed that the ship had run aground and she awoke to hear anxious voices and excited footsteps up and down. She raised her head and listened, then jumped out of bed and slipped her clothes on. Just as she was fastening her heavy serge dress of stout fabric and clumsy cut, with her inefficient well-shapen fingers, the door opened and Mrs. Laird, the matron, put her head in.

"That's right Martha," she said, "Put something on the other children and bring them up on deck. We must all be off in twenty minutes. I know I can trust you dear." Mrs. Laird's face was very pale as she hurried away.

Obediently Martha woke the other little ones in the cabin, there were four, and helped them on with their clothes.

"Whatever is wrong Martha?" ventured Glory.

"I don't know darling, it can't be very serious, as we have twenty minutes to get off the boat, but don't say anything more before these little ones as it will make them troublesome to manage if they get frightened, you must be my little helper, Glory."

In the deck was a scene of excitement. The other people who seemed calm and collected were the representatives of the Children's Home. They had assembled their charges four abreast and were already having them board the lifeboat which was waiting. True the superintendent's voice had an anxious note in it and the matron's face was very pale, but they both realized that their responsibility in handling and caring for these 200 friendless little souls who were so very close to disaster.

Glory held Martha's hand tightly as they went to lift her into the boat and it was only Martha's whispered reassurances that she was coming next that induced her to let go, and she breathed a sigh of relief when her friend was close beside her again.

"Do you know what did happen whispered Glory as the boat started for the shore which could be seen, a grey misty line in the distance.

"Mrs. Laird said that the vessel ran aground, and that this is the coast of Newfoundland. We shall have a mile to walk to the station and then we will go the rest of the way by train. Poor Mrs. Laird was very much upset," remarked Martha, in her old-fashioned manner.

It was a very much dilapidated crowd of little ones which reached the railway station. Most of them had been quite apathetic. Many were like little old men and women who accepted life philosophically as it came and nothing could surprise them. Poor as they were, they had been buffeted by fate since birth and had learned to meet life with the indifference of stoics.

"Wot's orl this?" Jimmy Brown had asked Tommy Jones, as they trudged slowly along that dark, damp morning.

"Eving only knows, I don't," responded Jimmy, aged twelve. "Somethink for a chinge I suppose. I wish if we was gwine to walk to Caning, for I'd rather weather. I'd just as soon walk all the wye anythin, that bloom'n' boat made me jolly seasick."

(To be continued)

Western Students Receive Post Graduate Scholarships Awarded By National Research Council

The post-graduate scholarships awarded by the National Research Council for this year were announced recently. The scholarships total in value \$38,600, and have been awarded to 55 students. There are five fellowships for which \$1,000 each are given, 24 studentships each carrying with it \$750, and 26 bursaries, to the value of \$600 each.

The students obtaining the scholarships, the University of Graduation and the Department of Science in which award will be held include: H. D. Smith, British Columbia, physics.

Studentships—Awarded in Western Canada: J. M. Armstrong, Saskatchewan, genetics; Miss M. H. Campbell, British Columbia, zoology; E. G. Hall, British Columbia, cellulosic chemistry; R. N. H. Haslam, Saskatchewan, physics; M. K. McPhail, British Columbia, biochemistry; F. L. Munro, British Columbia, physical chemistry; F. H. Nicol, Saskatchewan, physics; H. R. Sallans, Saskatchewan, organic chemistry; C. A. Winkler, Manitoba, physical chemistry.

Bursaries, awarded in Western Canada: J. F. Caley, Alberta, geology; K. R. Gray, British Columbia, organic chemistry; G. A. Harcourt, Alberta, geology; Miss J. F. L. Hart, British Columbia, zoology; O. J. Johansson, Saskatchewan, chemistry; N. B. Keefe, Saskatchewan, chemistry; H. B. Marshall, British Columbia, organic chemistry; J. H. L. Truscott, Saskatchewan, plant pathology.

A statement accompanying the results declared: "Selection of the successful candidates from the total of 166 who applied was made at the regular meeting of the council in March, but pending receipt of acceptances, public announcement was delayed. Since this reduces the number of awards available, the council reduced their value. These have been offered to the candidates selected and acknowledgments have now been received.

"It is the opinion of the council that students to whom awards have now been made will be able to continue their work satisfactorily in spite of the reduction in value which has been made necessary this year by the reduction in the fund made available by the council for this purpose.

"Because of recent statements indicating that a certain amount of misunderstanding exists, Dr. H. M. Tury, the president of the council, has made the statement that all applicants compete each year on their merit and that there has never been any guarantee whatsoever that awards once granted would be renewed for a second or a third year. That this, however, was often the case is indicated by the fact that in the 13 years in which the council has awarded scholarships, 478 awards have been made to 283 students but the awards are made each year to the applicants which in the opinion of the council are the most promising."

May Visit Russia

Rt. Hon. David Lloyd George, the Liberal chief minister, may visit Russia in September. Mr. Lloyd George is said to be greatly interested in the Russian five-year plan and wants to make a first-hand investigation. Once he has proposed a Russian trip and the Soviet Government offered him every opportunity to make inquiries.

"What a lovely car. How much did it cost you?"
"Three. Six of hysteria." Hummel, Hamburg.

WEEKLY—U.S. 1939

France Buying More Wheat From Canada

Report Shows Outlook For Future Sales Is Good

In the first two months of 1931 Canada exported to France nearly twice as much wheat as during the months of November and December of last year and seven times as much as during the first two months of 1930. This information was contained in a statement prepared for Hon. H. H. Stevens, Minister of Trade and Commerce, by Hercules Barre, Canadian government trade commissioner in France. This indicates a serious effort on the part of France to fulfil the promise made to Premier R. B. Bennett, when the prime minister and Mr. Stevens visited France after the Imperial conference, the report declares.

For the three months following the unofficial agreement between France and Canada, French imports of Canadian wheat have amounted to 6,482,174 bushels, an increase of 2,430,000 bushels over the three previous months.

While Canada has been selling more wheat to France, the imports from other countries have not kept pace. In January and February of 1930, Canada supplied 17 per cent. of France's total imports of wheat whereas in the first two months of 1931 she supplied 54 per cent.

That the outlook for future sales is good is indicated in the report. The domestic stocks of wheat in France of sufficient specific weight are decreasing steadily, requiring more and more the use of wheat of high gluten content for mixing. "As this condition is becoming more marked," the report states, "there is naturally a greater demand among millers for Manitoba wheat which is generally considered as most effective for strengthening purposes."

Bee Battalions Fly

Huge Stores Of Honey Now Being Accumulated By Busy Workers

With the arrival of the bright sunny days of spring and early summer and the wealth of bloom new growth brings, the bee battalions resume their annual work of storing honey. Canada's annual honey crop ranges into millions of pounds gathered in at apiaries located throughout the entire Dominion. We all know that the proverbial busy bee sets a commendable example, and that huge stores of honey accumulate in the healthy hive. A better appreciation of the magnitude of the task which is the bees' in building up their stores, is afforded by figures just released by the Bee Division of the Dominion Department of Agriculture. As the result of a series of studies conducted over a period of five years it has been found by weighing hives that an average of 31,000 bees per hive wing their busy way in search of sweet nectar from day to day during the height of the season.

British Egg Market

Britain Imports 4,610,000 Dozen Eggs Per Week

In the current issue of the foreign egg market report the Poultry Division of the Dominion Department of Agriculture indicates that Great Britain at the present time is importing upwards of 4,610,000 dozen eggs per week. Denmark, the Netherlands and Poland are the largest contributors to this huge volume of exports; other countries include the Irish Free State, Belgium, Finland, France, Germany, Italy, Sweden, China and Egypt. Canada is not, at the present time, listed as a consigning country although a market which imports such huge quantities of eggs should hold something of opportunity for Canadian producers.

World's Largest Seed Tester

Declared to be the largest in the world, the Swedish State seed testing station was recently inaugurated by the country's crown prince. It also is said to be the most modern in every particular. Last year 108,127 analyses were made by Sweden's seed testing department.

Good Prices For Export Cattle

Movement Of Live Cattle To Great Britain On Profitable Basis

Cables were received by Hon. Robert Weir, Minister of Agriculture, giving the prices received for the latest shipment of cattle to Britain. These are sufficiently high to make the movement of live cattle from Canada to the United Kingdom one of great possibilities.

At the same time British Co-operative Association representatives who have recently toured Canada, have undertaken, subject to ratification by their directorate, to take 75 Canadian cattle a week for 12 weeks, in order to decide the feasibility of a steady flow of 400 head weekly for the "Co-Op's" trade in Britain.

On the shipment for which the prices were made known, one carload of finished cattle from Calgary will net the shipper back in Alberta over \$5.65 per hundredweight. Another carload, also from Alberta, will net the shipper over \$6.00 per hundredweight.

With these prices known, a meeting of shipping representatives from Montreal has been arranged with Mr. Weir, to take place here, Monday, May 4, to canvass the number of cattle ready for shipment and the ocean space available. The present is an opportune time to ship cattle to the United Kingdom as Irish fat cattle are practically off the market for the next two or three months.

Will Travel In Modern Way

Dalai Lama, Of Tibet, Has Ordered Motor Car

Departing from all the traditions of his country and faith, His Holiness the Dalai Lama, ecclesiastical king of Tibet, has ordered an automobile sent to him at Lhasa, high in the Himalayas.

A newly trained Chinese chauffeur will pilot the car where routes are navigable, but where no roads exist, parties of 30 coolies each will be posted along the mountain passes and on the desolate Tibetan plateau to carry it in relays to its destination. Henceforth, all announcements received by the "devil wagons" by highly superstitious Tibetans.

A National Air Tour Of Over Seven Thousand Miles Will Be Held This Summer

League Of Nations

League Will Succeed If People Are Behind It, Says Dr. Tury

"If the League of Nations is going to succeed, it will be because the people of the world put themselves behind the principles for which the League of Nations stands."

This was the declaration made by Dr. H. M. Tury, president of the League of Nations Society in Canada. The distinguished scientist and student of world affairs, who is also head of the National Research Council, was speaking to a large gathering of members of the Border Cities branch of the League of Nations Society of Canada at Ottawa.

"The League of Nations," he said, "has passed through a great deal of criticism. This year it is facing one of its most serious situations because of the coming disarmament conferences. It will be either strengthened or weakened in public opinion as the result of that conference."

Poultry Grades

Canadian Standard For Dressed Poultry Is Published

A supplement to the Canadian Standards for Dressed Poultry issued by the Poultry Division of the Dominion Live Stock Branch provides the following classification of kinds and sub-kinds: Chickens include squab broilers, broilers, fryers, roasters, poultards, capons and stags; Fowl include hens and roosters; The Turkey classes are young hens, young toms, old hens, and old toms; Ducks—ducklings and ducks; Geese—goslings and geese; Pigeons—squab pigeons and pigeons; and Guinea—guinea chickens and guinea fowl. Complete definitions and packing instructions are now available for distribution to interested parties through the Publications Branch of the Department of Agriculture at Ottawa.

Signalling the progress of aviation in the Dominion, a national air tour will this summer be carried out by the Canadian Flying Clubs' Association, assisted by the Aviation League of Canada. From the standpoint of the mileage to be covered and the number of aeroplanes taking part, the tour will be the greatest ever undertaken in any part of the world, said G. M. Ross, secretary of the Canadian Flying Clubs' Association, in making the announcement at Ottawa.

Occupying two months, the air pageant will visit every city in Canada where there are flying clubs affiliated with the association. A minimum of 25 machines, in a variety of types entered by manufacturers, distributors, commercial operators and private owners will take part in a journey of some 7,500 miles.

Date of the commencement of the flights and the itinerary will be announced in the near future, Mr. Ross said.

It is expected the National Defence Department will officially sanction participation by Royal Canadian Air Force pilots. The association hopes through the tour to foster interest in the construction of municipal airports and to encourage wider use of air mail services. Flying exhibitions will be staged in conjunction with local flying clubs at various points.

Soliciting Business In British West Indies

Vancouver Woman Has Been Entrusted With Difficult Task

A woman has been chosen to find a market for the surplus oats production of the Fraser Valley, in British Columbia. She is Miss Edna Bridges, manager of the export department of a Vancouver grain company, and she is on her way to the British West Indies to see what can be done about dumping up business in that territory.

Every year the Fraser Valley ships about 3,000 tons of oats to the West Indies, where the grain is used as feed for mules working on sugar plantations. Miss Bridges will have stiff competition from German and Dutch salesmen, who have been taking a lot of business. "But," says the manager of the grain company, Ernest Buckenfield, "I have a suspicion that Miss Bridges will win. She is that sort of woman."

Heavy Tourist Traffic Forecast

Reports Indicate Good Business For West Says C.P.R. Official

Heavy tourist traffic for Western Canada this summer is confidently expected by the Canadian Pacific Railway, according to C. B. Foster, of Montreal, passenger traffic manager, who with H. R. Mathewson, general passenger agent, Winnipeg, has been on one of his regular semi-annual trips to the Pacific coast.

"There will not be so much European tourist trade from North America this year as in previous years," Mr. Foster said. "That, however, will result in more money being spent in Canada. Our reports from all parts of the continent indicate that there is no doubt about this."

A noiseless airplane is planned by a British engineer.

"I gave a man an old suit and he then asked me for three shillings."
"What for?"
"To get the suit disinfected."
— Buen Humor, Madrid.

The Short and the Long of It

John Griffiths, diminutive Liverpool boy with ambition, signed on the Canadian Pacific liner "Duchess of Richmond" as a "bellyboy" and made his first voyage on that liner when she opened St. Lawrence navigation for 1931 by reaching Montreal, Sunday, April 19th. John is 13, four feet and half an inch tall, and is looked upon as a mascot by the ship's company. With him is John Kane, Master-At-Arms of the "Duchess of Richmond," who as the tallest man on the ship stands six feet two inches above the deck.

WHEN CHILDREN FRET

THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness, Castoria has a good taste; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

**Fletcher's
CASTORIA**

WORLD HAPPENINGS BRIEFLY TOLD

The engagement of Princess Ileana to Archduke Anton de Bourbon, was announced at Bucharest.

The national council reconvened at Angora and unanimously re-elected Mustafa Kemal president of Turkey.

A little girl 11 years old arrived in Toronto, after travelling all the way from Zawiycha, Ukraine, to be reunited to her father, George Hume.

Canada led all the countries of the world in trade with the United States during the month of March, in respect to both exports and imports.

Direct telephone communication between Great Britain and Canada, and Great Britain and New Zealand, using the beam wireless system, will shortly be put into effect.

Approximately 13,500,000 acres of land will be sown to wheat in Australia in the coming season, compared with 18,000,000 acres last year, the government stated.

The new Arts Building of the University of Manitoba is now under construction and will cost over \$410,000. It will be built of Manitoba's native tapestry limestone.

Mrs. Edward Montagu, who started on a 6,000 mile flight through Russia and Persia, ceased her venture when her plane crashed and burned at Meshed, Persia.

Rt. Hon. J. H. Thomas announced that British representatives would attend the Imperial Conference at Ottawa with co-operation with the Dominions as their aim.

A verdict of accidental death was recorded by the coroner at the resumption of an inquest into the death of 48 persons in the wreck of the dirigible R-101.

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

SUNDAY SCHOOL LESSON

MAY 17

JESUS ENTERS JERUSALEM AS KING

Golden Text: "He is Lord of lords, and King of kings."—Revelation 17:14.
Lesson: Luke 19:28 to 29:47.
Devotional Reading: Psalm 24.

Explanations and Comments

Preparations for Christ's Triumphant Entry, 19:28-35.—And when he had thus spoken (his account follows immediately the giving of the "Parable of the Pounds"), Jesus went before His disciples on their way to Jerusalem. "The Jerusalem road is no Appian way lined with the tombs of dead gallantries; it is no macadam road running through the hills and over the moorland to the city or the sea. It is rather the direction of a quest, a purpose pursued, a desire adapted and a conquest won. It reveals the Christ of the sacrificial purpose."

The triumphal entry was deliberately planned. It was Jesus' last appeal to the people to accept Him as the kind of King He was. He would exhaust the possibilities of the situation, though He could not have expected to turn the people's mind away from the kind of king they wanted—an earthly rather than a spiritual sovereign.

In the neighborhood of Bethany and Bethphage, on the Mount of Olives, He sent two of His disciples to a near-by village to secure for Him a colt that had never been ridden, they would find tied there. In case the owner objected, they had only to say, "The Lord hath need of him."

These words may have been the password which Jesus had arranged with the owner of the colt. From John 12:1 we know that he had stopped for at least a night at Bethany, when they would have had time to make such an arrangement. An ordinary beast of burden would have been unsuitable for a distinguished rider, whereas the ass that had never carried any one met the requirements. It all happened in just that way—the colt was found, the question of the owner and the answer of the disciples were given, and the latter returned to Jesus with the colt.

By choosing an ass to ride upon, Jesus plainly showed the people that He was not to be thought of as a military leader, for the horse was used in warfare, while the ass was the fitting animal for the Prince of Peace. The people threw garments upon the colt for Jesus to sit upon and upon the roadway to make a carpeted passage for Him, all to honor Jesus as King, just as in our day Californians have strewn the roadway with flowers to honor a President.

The King's Royal Progress, 19:36-38.—As they went down the Mount of Olives toward the city, the joyous crowd shouted and praised Him, all the mighty works which they had seen, and cried "Blessed is the King that cometh in the name of the Lord." Compare Isaiah 62:1; Zechariah 9:9; Psalm 118:26.

"Peace in heaven and glory in the highest," they sang. These words were taken from Psalm 118, the Messianic Psalm. "Why peace in heaven?" Perhaps they meant that peace in heaven was prophetic of that peace He was bringing to earth. That He was the Unconquerable One, before whom all enemies would lay down their arms without daring to fight.—R. C. Gilie.

Mothers Value This Oil.—Mothers who know how suddenly a crowd may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Canadians Honored

Scientific Men Elected As Fellows Of Royal Society Of Canada

Ten Canadians distinguished in scientific and academic fields have been elected as Fellows of the Royal Society of Canada. The recipients of this honor, as announced are:

Section 1.—Rev. O. Maurault, director of Montreal classical school.
Section 3.—Dr. Harold Hibbert, McGill University; Dr. Joseph A. Pearce, Dominion astronomical observatory, Victoria, B.C.; T. T. Rosebrugh, University of Toronto.

Section 4.—Professor M. B. Baker, Queen's University; Dr. William E. Cockfield, geological survey, Vancouver; Dr. P. B. Warren, University of Alberta.

Section 5.—Dr. C. H. Best, University of Toronto; H. T. Gussow, Dominion botanist, experimental farm, Ottawa; Dr. Pierre Masson, University of Montreal.

The next meeting of the society will be held in Toronto, where the members will be the guests of the University of Toronto.

A large elephant will consume from 100 to 125 pounds of hay a day, besides the mash which is also given.

How Women Lose Fat In England

How would you like to lose unhealthily fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen, and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and keenness of mind?

Get on the scales to-day and see how much you weigh—then get a bottle of Kruschen Salts. Take one-half teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat, and you'll also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishwomen keep slim—why not you?

British Navy Will Visit Kiel

For the first time in 17 years a British naval unit will visit Germany this summer. The admiralty announced it had accepted an invitation from the German Government and that H.M.S. Dorsetshire and H.M.S. Norfolk, would pay an unofficial call at Kiel from July 4 to July 11. The last time such a thing happened was in June, 1914.

Reduction of railway fares in the Philippines is forcing bus lines to merge.

New Cunard Liner

Seventy-Three Thousand Ton Vessel Being Built In Scotland For Trans-Atlantic Travel

Practically the whole world will take some part or other in the construction of the new 73,000-ton Cunard liner at present being built at the yards of the John Brown Company, Clydebank, Scotland.

This liner, which when finished will be the finest liner ever constructed for trans-Atlantic travel, is the result of four years' intensive planning on the part of the best marine minds that could be brought together.

For several years before the ship was ordered, intricate tests were carried out in the laboratories of John Brown and Company, for which models—exact replicas of the new Cunard—were constructed. These models were placed in specially designed tanks and submitted to every condition of wave and wind that might possibly be encountered on the Atlantic Ocean.

When the final model was approved and the plans for the docking facilities completed at Southampton, work was commenced in the same yards in which the world famous "Aquitania" was constructed.

Right across the Clyde from where the new Cunard is being built is the River Cart. It will be necessary to cut a very large part of the bank of this river away as well as deepen it, as the launching of such a large vessel is without precedent; launching preparations are at present demanding a great deal of care in the working out of the problems of committing the giant vessel to the water.

This results to mind the great care and attention which was paid to the launching of the "Aquitania" when she was launched on the Clyde, and at that event it was found expedient to make a large cut in the bank of the river to allow for the ship to be launched.

The household equipment for this new "Queen of the Seas" will include 800,000 pieces of silver, 2,000,000 pieces of china, pottery and glass, and an incredible quantity of linen and furnishings of every conceivable sort.

Indications at present point to a launching early in 1932—considerably in advance of the date originally set last year when the order was given to John Brown and Company.

The first opportunity that the general public will have to view the construction of this new Cunard will be when the yards of John Brown and Company are opened for public inspection during Glasgow Week, and preparations are being made for thousands of visitors to be taken care of who are anxious to get a glimpse of this ocean giant in the making.

PIMPLES

Go Amazing Quick Way
Pimpled skin by "Douglas' Egyptian Liniment" is removed. A "doubling" discovery, this places like magic. Get "Douglas' Egyptian Liniment" from drugist today.

To Detect Intoxication

Chemical Detection Invented By

University Professor
A chemical detector of intoxication has been invented by Dr. Rollo N. Harger, of Indiana University. It makes possible an unerring detection of intoxication by taking a sample of the human breath and subjecting it to simple chemical tests. The device may serve police authorities to convict persons of driving motor cars under the influence of liquor. If there is alcohol in the breath the solution changes color from red to white even when the breath has no odor of alcohol.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning. Keeps away inflammation and prout flesh.

Central Heating Plant

The Northern Public Service Corporation and the Winnipeg Heating Co., have purchased a site for their new central heating plant, and work will commence soon. The cost of the plant is estimated at \$1,500,000. It will provide employment for 1,000 men.

MANITOBA POOL MAY ADOPT A NEW SYSTEM

Winnipeg, Man.—Manitoba Wheat Pool members will be given the right to choose between pooling their grain voluntarily, or selling it on the open market, if proposals announced recently by Manitoba Pool directors are approved by members. If the proposals are adopted, they will come into force June 1, 1931.

Contained in a letter signed by President Colin H. Burnell and forwarded to all Pool members, the proposals will be discussed at special meetings of 94 Pool locals in Manitoba, to be held during the last week in May. Under the suggested changes, all open-market sales would be handled by Manitoba Pool Elevators, Ltd., the Pool's elevator system.

Decision to pursue the way for alteration of the principle of the Pool contract, should members so desire, was reached at a meeting of the board of directors at Winnipeg, May April 10-13, at which consideration 1. It followed a directors' meeting was given to a resolution passed at the annual Pool delegates meeting last November, asking directors to call a 1931 summer meeting to consider the question of handling the 1931 crop.

If members of the Manitoba Pool approve the proposals — and it is expected that adoption will be unanimous — the grain handled by Manitoba Pool Elevators, Limited, will be "hedged" immediately on the futures market. "Hedging" is sale of grain on futures contract to guard against a price-drop. Decision to "hedge" grain would mark a drastic change in Pool policy, which has on basic principle spurned the use of "hedging."

Mr. Burnell lists the directors' proposals as follows:

- 1.—The pooling of grain to be placed on a purely voluntary basis.
- 2.—All grain not pooled to be sold through Manitoba Pool Elevators, Limited, on the open market.
- 3.—That the proposed changes be submitted to the 94 Pool locals at meetings which will be held in the last week of May, in order that every member may have an opportunity to become acquainted with them.
- 4.—That the plan come into force on June 1, 1931.

Every Pool member is urged in the Burnell letter to attend his local meeting "and give his personal support to this endeavor to carry co-operative marketing through a critical time."

Alberta Wheat Pool

Will Carry Out Its Usual Policies Says Henry Wise Wood

Calgary, Alberta. — The Alberta Wheat Pool will carry out its usual policies and members will be bound by contracts which they have signed, said Henry Wise Wood, chairman of the Alberta Pool, when informed that the Manitoba Wheat Pool will solicit the opinion of members as to whether they wish the privilege of selling their grain on the open market after June 1, through the Pool elevator system.

"Action by the Manitoba Pool has nothing whatever to do with our pool and I might say that we intend to carry on in the future as we have done in the past," Mr. Wood declared.

Children Had Long Journey

Winnipeg, Man.—A journey half way around the world, with another 24 hours to go, left three young Czech-Slovakians arriving in Winnipeg last undimmed. Anton, 9 years; Joseph, 8, and Helena, 5, travelling to their father, Anthony Lycka at Coleman, Alberta, spent a jolly hour in the precincts of the Canadian Pacific station before continuing their journey westward.

Boy Randell Escapes Lashes

Ottawa, Ont.—The 20 lashes to which Robert Kitowski, a Port Frances boy slightly over 16 years, was sentenced have been remitted by order-in-council signed by the Governor-General, Kitowski, who robbed a bank, was sentenced by a police magistrate to five years and 20 lashes.

W. N. U. 1889

Experts Will Attend Wheat Conference

Discussion At Canada House, London, England, Will Be Private

London, England.—All the wheat exporting nations of the world, including Soviet Russia, will be represented at the wheat conference opening on May 18, at Canada House, under the chairmanship of Hon. G. Howard Ferguson, Canadian high commissioner to Great Britain.

The United States has already indicated it is sending three experts. Russian participation is assured, and the conference, an outgrowth of the world wheat conference at Rome, will be enabled to make a thorough study of the world wheat situation so far as it particularly concerns the exporting nations preliminary to endeavors to reach agreement on some form of orderly marketing of the next wheat crops.

The conference is expected to last about a week and the discussions will be private.

Canada's high commissioner—Hon. G. Howard Ferguson—will represent this Dominion at the wheat conference to be convened in London, England, on May 18. The advisers who were present with Mr. Ferguson at the wheat conference in Rome will again act in the same capacity at the London wheat conference.

Installed In Office

Alberta's Lieutenant-Governor Sworn In At Impressive Ceremony

Edmonton, Alberta.—On May 5, Hon. W. L. Walsh, former supreme court judge of the province, became Alberta's fourth lieutenant-governor since its creation in 1905. Successor to Hon. William Egbert, he was sworn into office at the legislative buildings here in an impressive and brilliant ceremony attended by the viceregal retinue, Alberta's judiciary and members of the legislature. Hon. Mr. Walsh took the oath of office administered by Hon. Horace Harvey, chief justice of the supreme court of Alberta.

A colorful gathering attended the swearing-in ceremony. Col. A. C. Gillespie, aide-de-camp, met the vice-regal train at Millet, and accompanied the new occupants of Government House to Edmonton. Civic officials, as well as provincial government heads and prominent judicial representatives, greeted the first citizen of Alberta and Edmonton on his arrival here.

B.C. Cattle For Russia

Negotiations Opened Up For Purchase Of Pure Bred Stock

Vancouver, B.C.—It is understood that Soviet Russia may buy a number of purebred dairy cattle from British Columbia farms to strengthen the herds of Eastern Siberia. Negotiations were opened some months ago, and steps are now being taken to arrange the best means of handling them. They are to go from here to Japan, and will be trans-shipped from there either to Harbin or Vladivostok. It is understood that the first shipment will consist of 40 head.

Another movement of dairy stock from this province is that to Shanghai, and it is becoming a regular one. A dairy farm at Shanghai is taking about 10 head of good grade milkers monthly, and it is expected this will continue. It is in the nature of replacement, as mortality in the dairy herds at Shanghai is fairly heavy.

For Uniform Auto Laws

Inter-Provincial Convention To Be Held At Ottawa This Month

Montreal, Que.—An interprovincial convention will be held at Ottawa, May 20 and 21, where delegates of the roads departments of the various provinces will meet to discuss ways and means to obtain uniform laws regulating traffic on the highways of Canada. It was announced by Hon. J. E. Perreault, Minister of Roads, at the local provincial offices.

It was explained by the minister that, because of the inter-provincial traffic on the roads connecting the different parts of the country, it had become urgent to harmonize the regulations of automobile traffic.

Some of the laws adopted at Quebec had been widely discussed in the other provinces, said Mr. Perreault, and it is hoped that, when properly explained, they will be adopted by all.

EXILED TO SIBERIA

Mme. Vera Flegner, famous Russian woman leader, who, at the age of 76, has been exiled to Siberia for her protests of flogging by Soviet of 40 women members of Socialist party. Under the czarist regime she was repeatedly flogged and imprisoned for her attitude toward existing order of things.

Senate Craves Work

Lack Of Legislation Given As Reason For Slack Hours

Ottawa, Ont.—Restless because of inactivity, the Senate is searching for work. Since the present session opened, the Upper House has deliberated only about 10 hours altogether, because of lack of legislation originating in the House of Commons. Today, the Senate had an informal discussion on the aims and achievements of the League of Nations.

Rising at the conclusion of the informal debate, Senator John Lewis pointed to the lack of legislation to be considered by the Senate at the present time. "It was generally supposed by the Upper House acts as a 'brake,'" he said, "but he could see no reason why speed and direction of public thought could not be influenced also by the Senate."

Leads In Wheat Production

States That Russia Is World's Leading Producer Of Wheat

Washington, D.C.—Russia again is the world's leading producer of wheat. Figures supporting that unsuspected and highly significant statement were expected to be released about May 20, by the United States Department of Agriculture.

It was said that Russian production for 1930 likely would be announced at 1,097,000,000 bushels, which is 246,000,000 bushels more than was produced by the United States—largest wheat producers since Russia left the export picture during the war.

Eckener Will Meet Wilkins In Arctic

Announces Plan To Start For North Pole In July

Friedrichshafen, Germany. — Dr. Hugo Eckener, master of the Graf Zeppelin, announces he will start for the North Pole in his big ship about the middle of July to meet Sir Hubert Wilkins, who is going up there in a submarine.

This attempt to make a contact with Sir Hubert at or near the pole, he said, should clarify the question as to whether the airship is the most appropriate means for sending polar expeditions near their destination, picking them up later and providing them with supplies during their stay in the Arctic.

The Zeppelin expedition is to be financed by William Randolph Hearst, whose newspapers also are backing the Wilkins voyage.

The Graf will carry 45 persons on the Arctic flight, including Lady Drummond Hay.

It will take along complete polar equipment, including sledges, boats and Arctic clothing. The time of the start will depend on the progress of the Wilkins expedition.

Ottawa Dismissals

Information Given Out Regarding Retirements Of Employees

Ottawa, Ont.—Of the 1,295 employees of the Department of the Interior, who have been retired or notified of retirement, 442 were permanent on the staff at Ottawa, and 128 temporary. In the outside service 591 were permanent and 136 temporary employees. This information was given to E. R. E. Chevier, (Liberal, Ottawa), in the House of Commons by Hon. T. G. Murphy, Minister of the Interior, in answer to a question.

The Dominion lands administration service loses the largest number of personnel, with 442 employees being retired, or notified of retirement, while the forestry service loses 436. A total of 116 will be dismissed from the surveys bureau.

Letters Seized

Letters Containing Irish Sweepstake Tickets Stopped At Winnipeg

Winnipeg, Man.—Thousands of letters were seized at the Winnipeg post office because they were found to contain Irish sweepstake tickets on the English Derby. The seizure was made under orders of the postmaster-general of Canada, as sweepstake mail is illegal under Section 236 of the Criminal Code.

The postal staff here have seized numerous letters containing the tickets in the past week, but recent collection was the largest on record. The letters, disguised in various ways, will be returned to the dead letter office, Ottawa.

HAPPY SCENES IN MADRID

One of dramatic scenes typical of celebrations that marked the fall of King Alfonso and the establishment of a Spanish republic. Riding on the shoulders of their colleagues in Madrid, these republicans are waving the new Spanish republican flag.

WOULD EXTEND BRITISH TRADE WITH DOMINION

Ottawa, Ont.—"We are fully assured that there is a strong pro-British sentiment in Canada, and that the manufacturers in this country are willing to co-operate with English industrialists along lines that are complementary, and supplementary," Sir James Lithgow, president of the Federation of British Industries, said in an interview here. "We are fully conscious that there is over-production in the empire and throughout the world, for the relief of which British industrialists are willing to do their part, and we believe that there are openings and directions in which it is to Canada's advantage to present to buy in England."

Sir James is leading a trade delegation which has come to Canada upon the invitation of Hon. H. H. Stevens, Minister of Trade and Commerce, to study economic conditions and to discuss with the government and manufacturers of the Dominion ways and means of extending British trade in Canada. The other members of the delegation are Sir Arthur Duckham and Moir MacKenzie. They interviewed Mr. Stevens, but no statement was given out regarding the conference.

Busy Times Ahead

Prophecy Is Made That Canada Will Soon Need Immigrants To Meet Demand For Workers

Toronto, Ont.—Prophecy that Canada would be needing immigrants to meet the demand for workers within two years, was made by Col. R. E. Smythe, director of the Technical Service Council, at the 10th annual convention here of the Ontario office superintendents of the Employment Service of Canada.

It was urged that a clause requiring that 75 per cent of the help needed in construction of public works be secured through the Employment Service of Canada, should be included in government contracts. The Federal Government will be approached to ensure the inclusion of a clause to this effect.

It was resolved to request the department of labor to take additional means to discourage importation requests and that the Immigration department be asked to check carefully all skilled workers seeking admittance to Canada.

Probe Mail Thefts

Series Of International Mail Robberies To Be Investigated

New York.—Postal authorities both here and in Great Britain began an investigation of a series of international mail robberies, the extent of which officials have not yet been able to determine.

A systematic rifling of letters, some containing remittances to persons in Ireland, has been going on some time, it was learned recently. United States and British postal authorities have been pushing their investigation, co-operating by cable.

It is believed the mail has been robbed on the United States side and not after reaching England and Ireland.

Grain Shipments

Alberta Wheat Stored At Coast Is Now Moving Rapidly

Vancouver, B.C.—Grain stored for many months in the Victoria and Prince Rupert elevators, controlled by the Alberta Wheat Pool and the New Westminster elevator, is now moving. At Prince Rupert it is expected the bulk of the 1,000,000 bushels in storage all winter will move out within the next week. Two full cargoes of 10,000 tons each have been fixed for the Victoria elevator within the next fortnight, leaving 10,000 tons in storage. At New Westminster the Belgian steamer "Suvier" commenced loading 1,800 tons for Antwerp.

Reduced Wheat Acreage

Canberra, Australia. — Approximately 12,500,000 acres of land will be sown to wheat in Australia in the coming season, compared with 18,000,000 acres last year, the government states.

CHAPTER XVII.—Continued

On the day when the boat dropped anchor in Port Antonio, Nick was up with the dawn. One glance through his porthole had driven him out of bed, in order not to miss a moment of the enchanted scene. Mountains, purple and hazy in the background—palm-covered hillsides dotted with red-roofed huts or houses—hedges of flaming hibiscus—sapphire skies, and water as blue as turquoise. The tropics!

Early though it was, boys with shining black bodies were swimming about in the water, as much at home there as were the fishes that kept them company. On shore were women, carrying huge baskets on their heads, or hung with gaily colored beads to sell to the tourists who would soon land.

The warm air—the rich coloring of the landscape—the very difference from the ice-clad New England he had left behind, caught Nick's imagination, and held it spellbound. If Gay were only with him! Sudden regret flooded through him—regret that she could not see it—that she was not here to share his joy in these strange,

new sights. Share it he must with someone, or . . .

"It's fairlyland, isn't it?" said Angela, her shoulder brushing his as she joined him at the rail.

She had approached so quietly that Nick heard no footsteps, but he turned, throwing her a glance of unadmitted rapture—not rapture at her own charm, which was indeed great, but at the scene before them, and at "Life," which had given him this chance to drink it.

"It's a dream come true," he answered. "I feel inclined to pinch myself, just to be sure that I am 'I.' I envy you the weeks you'll have here, Angela." (It had become "Nick" and "Angela" during those days of intimacy on the boat.) "Kingston, I believe, is more of a city. However, I've got today to revel in it."

"Will you let me revel with you?" "That will be bully, if your friends will let you off."

She laughed softly, not thinking it necessary to explain that her friends were wholly innocent of her arrival.

"They'll have to. We'll go for a drive, Nick—nirone one of those ridiculous darkeys to take us who know it's not as new to me as it is to you. I came here with Mr. Halliday five years ago. Shall we wait for breakfast on the boat, or go ashore and get it at the hotel?"

"Let's go ashore. I can't wait another minute to begin exploring."

It's all too wonderful to be true, (he wrote Gay in his first letter after getting settled.) It was a cinch meeting Mrs. Halliday, for she knew the ropes and just what I ought to do in the few hours I had at Port Antonio. We took a marvellous drive to Blue Hole, seeing strange and unbelievable things on every side. She was bulky good company, too, and looked a peach, as she always does. I felt quite proud to be towed about by such a lovely lady. Tell Halliday that I may make him sit up and take notice of her.

But you needn't. I know how you feel about Mrs. Halliday, so for your comfort I'll say that we've parted company. It was a queer coincidence our taking the same boat; but she's stopping at Port Antonio, and my work will keep me at Kingston for the present. So don't worry about your wandering boy. You wouldn't if you knew how constantly he thinks of you, and what a slinner he feels to enjoy things so tremendously when you aren't with him.

I'm only half alive without you, Gay. I'm like a man going about minus an arm or leg. That's not sound romantic but if you'll stop to analyze it you'll see how necessary you are to me—you and our precious little boys. I'm conscious of missing something all the time. . . .

Yes it was doing him good—the change. Gay saw that in his letters, which breathed of his old buoyancy. He wrote a page or two each day, and mailed them whenever a boat was going. Gay did the same, relating the home doings with the skill of a real story-teller, repeating the funny sayings of the children, and the quaint remarks of Uncle Sim, in a way that brought them very near to the absent one.

But she did not mention Angela Halliday. Nick noticed the omission, and put it down to forgetfulness until other letters also ignored the meeting. He knew then that Gay had purposely refrained from writing of it.

"She didn't like it," he puzzled, "yet she can't be jealous. That would be too absurd. Perhaps she just couldn't say anything pleasant on the subject so she said nothing. That would be like Gay—bless her dear heart! Still, I wish she'd spoken of it. Makes me feel sort of uncomfortable. She might at least have mentioned the coincidence of our meeting."

As for Halliday, he had turned the key on the Boston apartment and gone back to Bakersville. On Thursdays and Sundays, when Julie was off duty, he and little Martha had supper with the household across the hedge. To him, at least, Gay had not been silent regarding that unexpected meeting.

"It was so nice that Nick should find a friend aboard the boat," she said; while Halliday answered: "And equally nice for Mrs. Halliday."

day liked to see it. Gay looked a real madonna with that Nick nudged in her arms, while Sony and the little girl leaned lovingly against her on either side.

"That's something they ain't any of 'em ever good for to forget," he said to Sony, who was leaning over to take his small charge home to bed. They stood in the doorway of the living-room, which was lighted only by the blazing logs upon the hearth. Deep in her story, Gay was wholly unaware of any audience save the youthful one beside her. Little Nick was in his nightg, his small, bare feet stretched out to the welcome warmth. A big log burst apart, sending a shower of sparks into the dark above, and casting a veritable halo about Gay's head.

James Halliday breathed deeply at the words.

"No," he responded, "they will never forget it. I wonder if it isn't memories such as this, that keep us from falling when the way seems hard. I can remember—"

He broke off suddenly, as if his thoughts had betrayed him into an indiscretion. And in that moment little Martha turned and saw him. She slipped from Gay's encircling arm, and ran to him.

"I love you best," she whispered, as he lifted her up. "I love you best of anyone."

It was the next day that Martha forced him into a decision he had long been considering. She was watching him use his typewriter, a pursuit of which she never tired; and having become accustomed to her presence it did not disturb him, because she rarely spoke. But this morning as he paused, hunting an elusive word, she said: "Sonny and little Nick—they have a daddy."

Halliday smiled.

"He sends them postcards, an—an letters, when he's away."

Halliday lifted the child onto his knee and pushed his machine aside, as if this interruption were more important.

"I—want one," went on the little girl soberly. "Couldn't you be my daddy? I'd like you best."

He held her a little closer.

"Are you, s'p'ose," he questioned with pathetic eagerness, "Are you quite sure I'd make a satisfactory one?"

"You're my best favourite," answered little Martha.

She reached up a small, plump hand to touch his cheek. Halliday caught and kissed it.

"Then," he said huskily, "that settles it. I believe you're my 'best favourite,' also."

But Martha, it seemed had more to say.

"They have a mother, too," she hesitated.

The new-made father winced.

"I know, but—wouldn't I do for both?"

"I'd like Mrs. Hastings for my mother. Please, Daddy."

The new-made father dropped sweetly and naturally from the child's lips, and Halliday, bending, kissed her bright head in passionate gratitude.

"I'd like—her," she persisted.

Had she looked up she would have seen a dark flush mount in the face above her.

"Do you know what a family is, dear little girl?" he questioned gently.

"Are—we one?"

He smiled.

(To Be Continued.)

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT 'CAME BEFORE! Landing his plans near the Chinese war zone Captain Jimmy takes three enemy prisoners away from their cruel captors. In the confusion that follows, he knocks out the Chinese Colonel by mistake.

After the Colonel recovered, I told the interpreter to tell him I had orders to take the three unfortunate enemy prisoners back to General Lee, who was a personal friend of mine.

Colonel Jay," answered the interpreter, "the personal friend of Christopher Columbus, too, 'at his'."

Then I showed my pass. The Colonel glared at it in embarrassment. He could not read a line. After some prodding he consented to let me have the prisoners, but would not lend a hand to us. We were spoiling for fun, and we knew that if he could upset our plans without costing them General Lee's orders, he would gladly do so.

So after dark we quietly stole out of the house with our prisoners—but as we came near the plain, darkness, sinister figures moved about.

"Little China boy say big China boy full of soup. Get on big rock, brakes wing."

That was enough for me. Feeling round in the dark, I found a big rock about half the size of a man's head. Bringing it back, I tossed it into the air, so it came down in the middle of the group.

There was a howl of pain, and then, as a time. Each one seized the other of hitting him, and in no time at all they were all at it, hammer and tongs. This

gave me my chance, and I crept up toward the cockpit of my plane. A few feet more, and I could snare out the dim shape of someone sitting there—keeping watch!

I gathered myself for a spring. The fight was about over up front and any noise would be quickly noticed. So, throwing caution to the winds, I jumped for that Chinese in the plane.

He turned with a blood curdling yell just as I hit him on the head. Not bothering to see what happened, I leaped over into the cockpit; found my gun just as I switched on my searchlight. The result was electrical. The mob started to rush back to the cockpit, when suddenly, with a bang the light flashed full in their faces.

Startled, they stood perfectly still for an instant, then broke and ran. So far, so good. I waited a while.

There was a commotion in the field of vision. I was driving the prisoners in, and making them sit.

"You u China boys hold wings," I told them, showing them how to sit. I gave the propeller a whirl. "Climb in," I yelled, and we started.

Soldiers were running from camp to cut us off. Crack! went a rifle and a shot sped by. Crack! went another and another. Up the road we came, gathering speed. Another thirty seconds and we were lifting, while the Chinese soldiers snarled away until we were out of range.

Have you ever felt that something was wrong, and didn't know what? Have you ever sensed that someone was about to grab you but you couldn't see him? That was just the way I felt now.

It was about to jump on me. Instinctively I turned my head and looked right into the eyes of one of the most vicious, blood-thirsty faces I ever saw. It was the man I found in the plane. His arm was raised, and dimly, I could see the glint of the long thin knife-blade he held through my mind flashed the thought, "Well, it's all over now."

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

Observed Ancient Fast Day

Mills were silent in New Hampshire, April 23, and stores were closed for the Granite State was observing fast day, a holiday that has come down from earliest colonial times. The day originally was set aside each year by the Puritans as one of fasting and prayer in which to offer thanks for surviving the bitter New England winter and in which to pray for the success of crops in the forthcoming season.

A New Food For Cattle

A floating fish meal plant, capable of turning 50 tons of fish into 12 tons of meal every day, is at anchor in Gothenburg, Sweden. The mill is installed on board a four-masted fishing ship. It grinds all the superfluous catch of the fishing trawlers, which was formerly thrown overboard, into a flour nutritious for pigs and cattle.

Seventeen thousand teachers now instruct London's 700,000 pupils.

What's in a Name?

Plenty. When it's McCarty

IMPORTANT! Have you seen the new McCarty Coal and Wood Ranges? New, different, beautiful, efficient, they represent the finest value ever offered Canadian women.

CORN'S LIFT OFF

Pain Stops! An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any drugist for 35c.

PUTNAM'S

The John Thomas' Appeal Dismissed.

A case of interest to those
in the Spruce Grove district,
where he is well known, is
that of John Thomas, who was
sentenced a short time ago
by Mr. Justice Boyle to three
years' imprisonment on two
charges of conspiracy to def-
raud. An appeal was made
to the appellate division of the
Supreme Court last week, and
the appeal was dismissed. The
conspiracy charges arose from
the alleged swindling of farm-
ers in a farm-purchase "skin
game." The appeal was dis-
missed upon the conclusion of
the plea for the appellant,
presented by J. N. McDonald.

To Vote on the Compulsory Wheat Pool.

It has been announced that
members of the Alberta wheat
pool will vote on the 100 per
cent wheat pool plan; voting
to take place between July 1
and 15. The action of the Ex-
ecutive follows instructions
given by delegates at the an-
nual wheat pool convention
held in Calgary in November.

Ballots will be sent members by
mail, and will read: "Are you in
favor of a 100 per cent pool by
legislation?" Answers must read
yes, or no. The pool executive
will provide all information, pro
and con, which pool members
might request. The result will be
placed before the 1931 Pool con-
vention to be held in the Fall.

H. W. Wood, chairman of the
board, and other officials of the
Pool have steadily maintained
their opposition to the compulsory
pool idea in this province.

Edmonton Beach.

A draft of the events cele-
brating Victoria Day (May 24)
this year at the Beach shows
that Mr. Barrie is planning an-
other big surprise for his pat-
rons. An attraction is being
planned for Sat. afternoon,
May 23, with a dance in the
pavilion in the evening.

A Midnight Frolic is being
arranged for Sunday at 24.05.
In other years the Frolic was
preceded by a concert; this
year there will be presented a
3 act skit "Safety First."
There will be no regular
charge for admission to this
latter.

The holiday proper will be
celebrated, Monday the 25th.
A big program of popular
events to be run off in the
afternoon is being drafted;
with a big dance in the even-
ing, to wind up the three-day
celebration.

There will be a series of
games played by the clubs in
Stony Plain basketball league
at the Beach, commencing on
Tuesday, May 26, when the
Stoneyites will meet Comet.
This will be a doubleheader.

Mr. Barrie has succeeded in
signing up Martin's orchestra
for the season at the Beach.
This news will be hailed with
delight by the many dancers
who favor the music supplied
by these popular musicians.
The Martins will take up their
residence at the Beach, hav-
ing purchased lots and are
intending to build.

Mr. Barrie reports the sale
of lots at the Beach, this
season, far ahead of the re-
cord made in the Spring of
1930.

Newest Locomotive is Monster Indeed

The largest and most powerful
locomotive of its kind in the
world has just been completed in
the Angus Shops of the Canadian
Pacific Railway, Montreal, for ser-
vice in the Rocky Mountains. The
new "8000" locomotive represents
a new era in the advancement
of steam motive power of greater ef-
ficiency and higher sustained ca-
pacity. It is called a "multi-pressure"
engine because it generates its steam
in three separated portions and at
three different pressures and, because
of its radical departures in boiler design,
is creating something of a furor in me-
chanical and railroad circles.

Facts and figures of the "8000" will
give some indication of its magnitude,
efficiency and strength. It is only a scant
nine inches short of 100 feet in length.
Weight of engine is 435,000 lbs. and of
tender 300,000 lbs., making a total of
735,000 lbs. or 327½ tons. It has five
driving wheels on each side, each of which
is 58 inches in diameter. Its tractive effort
is 90,000 lbs., which means that on a level
track it will haul a freight train, over a mile in length, made up of one hundred and fifty 40-ton cars, and representing a total weight of 6000 tons. Its tender has a capacity of 12,000 gallons of water and 4350 gallons of fuel oil enabling it to make long hauls without replenishing. There are 18,995 feet or slightly over three and a half miles of seamless steel tubes used in the construction of the boiler units alone.

An outstanding feature of the "8000" is the firebox unit which is a closed circuit in which 300 gallons of distilled water are continually circulating without loss by evaporation. Distilled water is used because it prevents accumulation of sludge and scale so common in water tube boilers. The closed circuit or firebox unit extends into the high-pressure boiler drum in the form of 16 coils, called heat transfer coils.

There are three locomotives of this type in Europe and they show excellent savings in fuel, ranging from 25 to 35 per cent, as compared with the conventional type of locomotive. But the argument of the Euro-
pean locomotive of this type is only 42 per cent of the weight and develops only 38 per cent of the power of the "8000." It will be used in the Rocky Mountain territory of the company.

H. B. Bowen (inset) Chief of Motive Power and Rolling Stock, Canadian Pacific Railway, working in co-operation with the American Locomotive Company and the Superheater Company, of New York, designed the "8000" after he had made a special trip to Europe in 1929 to study locomotive types and development. The construction of this monster locomotive was handled under direct supervision of Mr. J. Briggs, Works Manager, Angus Shops, and Mr. T. Donald, of Mr. Bowen's staff.

Layout shows full length view of the "3000"; front-end view; and, inset, Mr. Bowen, designer of the locomotive.

Church Services.

Sunday next, May 17th, English
Lutheran service at St. Matthew
Schoolhouse at 7.30 p. m., by Rev.
H. Kuring.

United Church service every
Sunday Evng. at 7.30.

No Increase in Gasoline Tax

The Alberta Gov't has no
intention of increasing the
gasoline tax this year; and in
fact has given no considera-
tion to the matter, according
to a statement made by the
Minister of Public Works.
This was in reply to a ques-
tion expressed by the president of
the A. M. A., when he said
there were rumors that the
levy would be raised from 5c
to 8c per gal. The Minister
points out that such action
would first have to be ratified
by the Legislature.

Found at the River.

While some excavating work
was being done down at the
river last week the machine
brought up a number of bones
the size of which impressed
the workmen as belonging to
some pre-historic animal.

Figuring from the size and
shape of the bones produced,
the local distinguished phys-
ical anthropological authority
has arrived at the conclusion
that these belonged to a for-
mer Pterodactyl Mammal, the
highest class of the Verte-
brata, and was probably eating
grass about the same time
that King Nebuchadnezzar
was.

The find was made in the
clay underlying a strata of
shale. As a rule, the bones of
the dinosaur are found in the
valley of the Red Deer, from
Tail creek to the Rosebud;
but occasionally these are dug
up in the beds of the rivers
adjacent thereto.
